308 Lasani Town, Sargodha Road, Faisalabad - Pakistan

## Corrigendum

In the article entitled “Parasitism of *Mesohomotoma tessmanni* Aulmann (Psylloidea, Carsidaridae), psyllid pest of *Theobroma cacao* and *Octolobus spectabilis* (Sterculiaceae) in Cameroon and taxonomy of parasitoids published in the Journal of Agronomy 2007, 6 (1): 40, *Psyllaephagus mesohomotomae* Tamesse & Tiyo was used as the name of the new species of encyrtid parasitoid of cocoa psyllid, *Mesohomotoma tessmanni*.

Recently we were informed by John S. Noyes (Leader, Chalcidoidea/Biocontrol group Department of Entomology, Natural History Museum, London) that *Psyllaephagus mesohomotomae* was already used as the name of a different species by Hayat (2006). Under the International Code of Zoological Nomenclature the name of the Encyrtid parasitoid of *Mesohomotoma tessmanni* should be replaced. We proposed the new name *Psyllaephagus tessmannii* Tamesse & Tiyo to replace the former name *Psyllaephagus mesohomotomae* Tamesse & Tiyo.
