

A CASE OF PLAGIARISM

The authors have plagiarized a scientific research report entitled “On the symmetrizing transformation of random variables”. The corresponding author Mr. M.T. Uddin was a former student of Professor Chaubey’s but that Mr. Uddin’s studies at Concordia ended on or about 2002.

One of the conditions for submission of a paper is that authors declare explicitly that their work is original and has not appeared in a publication elsewhere. Re-use of any data should be appropriately cited. As this article represents a severe abuse of the scientific publishing system. The scientific community takes a very strong view on the matter and we apologize to reader of the journal that this was not detected during the submission process.

We thank Professor Yogendra Chaubey and Concordial University for bringing this plagiarism to our attention.
